

The FCC proposal to require that all broadcasters record programming from 6A to 10P seven day a week and to retain such records for 60 days is a very bad idea for small market stations like mine. We do not, and have never, carried programming that in any way can be considered indecent. We are a struggling business just barely paying the bills. Our days of delivering full service news and public affairs programming are numbered because the ad support just isn't there. The WallMarts and Home Depots are killing us and the Main Street businesses that support us. We've been doing this for 44 years. We just can't stand another layer of regulation like this.
